

AKRAM NAOUFEL TABET

London, NW2 4JD, United Kingdom | P: +44 7340431173 | w1979246@westminster.ac.uk

I am a Computer Science Engineer with a Distinction-awarded MSc in Data Science from the University of Westminster. I have hands-on experience in software development, machine learning, and Natural Language Processing (NLP), with skills in Python, Java, and SQL. Fluent in English, French, and Arabic, I have worked on real-time data systems, mobile applications, and enterprise solutions using technologies like React.js, Django, and Salesforce. I am actively seeking opportunities in software development or IT internships and am available to start immediately.

EDUCATION

UNIVERSITY OF WESTMINSTER

MSc Data Science and Analytics

Distinction Award

Relevant Courseworks: Data Mining, Machine Learning, Business Analytics, Big Data Theory, Data Visualization, Data Warehousing, Generative AI

London, UK

Sep 2023 - Oct 2024

Higher National School of Computer Science, ESI

State Engineer's Degree in Computer Science

Distinction Award

Relevant Courseworks: Mathematical Analysis, Data Structures, Business Intelligence, Database Management, NLP, Software Engineering, Data Mining

Algiers, ALGERIA

Sep 2017 - Oct 2022

WORK EXPERIENCE

Technology Intern

Bright Network (Remote)

LONDON, UK

Jun 2024 – Jun 2024

- Engaged in a tech internship, gaining insights into sectors including Data Science, ML/AI, and drones, guided by professionals from companies like BT Group, Deloitte, and PwC.
- Worked with real-life data samples from Deloitte and PwC, enhancing skillsets in data science and professional networking.

SARL Brainstorming Digital Solutions

IT Support Technician

Algiers, Algeria

Jun 2023 – Sep 2023

- Successfully streamlined IT issue resolution time by 30% by introducing a structured ticketing system.
- Upgraded outdated systems and software, reducing compatibility issues across departments.
- Contributed to the implementation of enhanced security measures, including setting up firewalls and improving antivirus protocols.

Soft-Innovation

Junior CRM Salesforce Administrator (Remote)

Paris, France

Jan 2023 – Jun 2023

- Contributed to the implementation of a B2B CRM for INWI Business.
 - Developed and maintained an integration platform for real-time data integration.
- Technologies: Salesforce (Object Manager, Lightning Components), Talend Data Integration, Apex, MongoDB

TÉLÉCOM SUDPARIS in collaboration with COGIGROUP

Research, Data Scientist

Paris, France

Oct 2021 – Sep 2022

- Conducted real-time data aggregation and analysis for relevant web data.
 - Developed machine learning models for webpage classification and information extraction using BERT and NER.
- Technologies: Python, NLP (BERT, Spacy, NLTK), Scikit-Learn (logistic regression etc.), Dash, Git

Freelance

Mobile Developer

Algiers, Algeria

Dec 2020 – Sep 2021

- Designed and developed a comprehensive e-commerce application.
 - Created online ordering and delivery service pipeline.
- Technologies: Flutter, Dart, PostgreSQL, Firebase, Google Maps API

ACADEMIC PROJECTS

Interactive Chatbot for E-Commerce	2024
Built a generative AI-powered chatbot for e-commerce, delivering personalized responses, product recommendations, and real-time order updates. Technologies: Python, Streamlit, AWS (SageMaker, Lambda, S3), Large Language Models (LLMs), RAG, Git	
Tesla Model 3 Experience Analysis	2024
Conducted analysis on social media data to understand owner sentiments, themes, and issues, using tools like VADER for sentiment analysis and LDA for topic modeling. Technologies: Python, EDA, Sentiment Analysis, NLTK, YouTube Data API, Sentence Transformers	
Global Happiness Explorer - 2020 World Happiness Report	2023
- Analysed the 2020 World Happiness Report dataset using R for data wrangling and statistical analysis, revealing key trends across 150 countries. - Created interactive Tableau dashboards with dynamic visualizations to effectively communicate insights, emphasizing a balanced approach of analytical rigor and data storytelling. Technologies: R, Tableau, Data Wrangling, Statistical Analysis, Data Visualization	
Early Detection of MPOX Virus	2023
Developed a cost-effective machine learning model for MPOX virus screening based on 2022 PCR test data. Technologies: Python, SVM, Decision Tree, Logistic Regression, KNN, GridSearchCV	
Comparative Analysis of Clustering Algorithms for EDA	2023
Conducted a comparative analysis of various clustering algorithms from sklearn to identify the optimal approach for exploratory data analysis in scenarios with limited dataset information Technologies: Clustering Algorithms: K-Means, Affinity Propagation, DBSCAN, Birch, OPTICS, Agglomerative Clustering, Spectral Clustering	
Real-Time Data Integration for Telecommunications	2023
Implemented a real-time data integration solution for Inwi, optimizing data synchronization for accuracy and efficiency. Technologies: Talend Data Integration, Salesforce, MongoDB	

SKILLS AND CERTIFICATIONS

Languages: Arabic (Native), English Professional (IELTS B2), French Professional (TCF B2)

Technical Skills

- ✓ **Programming:** Ability to code in Java, JavaScript, Python, R, C#, Dart, HTML/CSS, SQL, XML
- ✓ **Frameworks:** Laravel, Flutter, Django, Bootstrap, Power BI, Tableau, Talend, Dash, QGIS
- ✓ **Data Science:** Python (Numpy, Pandas, Seaborn, Matplotlib, Sklearn, Keras, Pytorch, TensorFlow, CatBoost, XGBoost), **NLP:** BERT, Spacy, NLTK, NER. **Data Extraction and Analysis:** Web Scraping (Selenium, Scrapy), EDA, **Data Visualization:** Dash, Tableau, Power BI, Advanced Data Visualization Techniques, **Statistical Analysis:** Regression Analysis, Hypothesis Testing, Time Series Analysis, Predictive Analytics.
- ✓ **Machine Learning:** Classification (SVM, Decision Trees, Logistic Regression, KNN), Clustering (K-Means, DBSCAN, Affinity Propagation), Regression, Ensemble Methods (Random Forests, Gradient Boosting), Generative AI (RAG, LangChain, Vector Embeddings, Fine-tuning and Model Deployment), Model Evaluation: k-fold Cross-Validation, Hyperparameter Tuning (GridSearchCV), Model Interpretation (SHAP, LIME)
- ✓ **Salesforce:** APEX Triggers, SOQL/SOSL, Workflow Automation, Data Analytics
- ✓ **Cloud/DevOps:** AWS Certified Cloud Practitioner, CI/CD, Docker, Gitlab
- ✓ **Cyber Security:** Network Security, Encryption, Threat Analysis

Certifications & Training: Coursera (Python for Data Science, Generative AI, Machine Learning Specialization), AWS Cloud Practitioner, Salesforce Certified Administrator

Additional Skills: LATEX, UML Modeling, Office Suite (Word, Excel, PowerPoint), Packet Tracer.

Soft Skills: Open and Curious Minded Individual, Excellent team player, Strong problem-solving and analytical skills, risk evaluation, Excellent in time management and organization, Data Curiosity, Proactive attitude and willingness to learn

INTERESTS

Sports: Enthusiastic about fitness and long-distance running

Technology: Passionate about AI advancements

Cooking: Enjoy experimenting with new recipes
